The Sales Manager,

Global Systems Lts.,

53, Topiwala lone,

Lamington street,

Mumbai-4000 089.

Sun: Received damaged consignment vide Order no.456

I am writing to inform you about the consignment of 06 computers and 03 scanners which were delivered to our society office in a damage condition. On a detailed inspection, it was observed that adequate care was not taken during the transportation, with the credits and cartoons noticeably damaged. Two out of the six Dell desktop monitors we had ordered are not functioning the two scanners are also faulty. There are major issues with two of the CPU with the computer shutting down abruptly, resulting in the loss of data and time.

This negligence and substandard quality of computers deliver to us is not acceptable at all, especially considering the long standing Association you've had with our society. Your store had been known to provide quality computer systems and service in the past. Such incident would only serve to tarnish the reputation of your store.

I expect your to redress this issue at the earliest, with the only two options available being a complete refund or replacement of all the damage equipment. I look forward to a speedy resolution of this matter, and would expect a positive response within three day of receiving this letter.

Q3(a) write a short note on chronomics(Temporal). (03)

Ans: Chronmics is the study of the use of time in nonverbal communication the way that one perceives and values time, structures time and reacts to time frames and schedules. Across cultures, time perception (which include punctuality willingness to wait etc.) Play a role in the non verbal communication process. Time can be used as an indicator of status (meetings, appointments). Cultures are sometime considered as monochromic and polychromic where in monochromic time system means that generally one thing is done at a time and polychronic means a system which allows multitasking. A person's punctuality or tardiness communicates his attitude, his time management skills and the way he is respecting the time of other.

For instance if a person belongs to a society and culture which emphasizes on punctuality, and he is communicating with a person from diverse culture who emphasizes more on the task then on the time, there are bound to be barriers. Search perception and barriers must be overcome by understanding Chronemics.

Q4.(b). Write a short on following concepts. (06)

1. Significance of a feedback

2. You attitude

Ans: 1. Significance of a feedback

Feedback is a response from the receiver that inform the sender how the communication is being received in a General feedback is invisible essential to make two way communication effective feedback is significant in the cycle of communication because of the following reason:

- a) The sender can get to know whether the message was transmitted successfully.
- b) Whether the intended receiver received the message.
- c) Whether the receiver interpreted the message in the intended manner.
- d) Whether there is a need to resend the message or take the communication ahead.
- e) If a business takes its feedback from customer in the right spirit it will be on the path of continuous improvement.

- f) Providing constructive feedback to employees can help them to continuously improve. Feedback is what makes the cycle of communication complete. For example, in classroom, from the nonverbal and verbal feedback from the students, a teacher can get to know whether the lesson taught is clearly understood by the student or not and whether there is a need for further explanation. Hence it is rightly said the feedback is the backbone of an organisation.

2. You attitude

Your attitude is a style of writing in official business correspondence that looks at things from the reader's/reception point of view and takes the interest and benefits for the reader into consideration. While writing a business letter the advantages of the reader must be kept in mind, as the reader will respond well if the writer show consideration for his/her interest you attitude respects the readers Intelligence and time protect the reader ego and emphasizes on what the reader want to know.

This can be achieved by using "you" more often than I in positive situation but avoiding "you" in negative situations.

E.g1: Lacks you attitude: We must receive your receipt with the Merchandise before we can process the refund.

With you attitude: please enclose the receipt that with the merchandise so that your refund can be processed promptly.

Eg. 2: Lacks you attitude: I will give you 10% discount
You can get a 10% discount.

2. Everything is wrong in this company.

Ans: 1. Linguistic barrier arising from incorrect uses of grammar.

2. Psychological barrier arising from negative attitude.

Q5.(a). Explain in detail cultural barriers. (03)

Ans: cultural diversity makes communication difficult as various cultures give rise to different gesture, behaviour, languages, opinions and social norms. Communication shapes culture and culture shapes communication. How will we communicate is determined not only on how we say things, but on how well we are understood by other,

irrespective of their cultural background. Cultural barrier arise because there are significant difference among people, which are reflected in some of the following areas:

1. Languages: Idioms, Phrases and connotation are different across different language.
2. Concept of time: Asians have a very relaxed attitude towards time where is European are particular about adherence to time in the professional and personal relationship.
3. Concept of space: the concept of personal space varies from culture to culture.

4. Non verbal communication: Body language, gesture, colour, attire all this have different meaning for different cultures. The best way to overcome cultural barriers in communication is to emphasize with other communicates and respect their culture (as well as ours) and try to keep a ride difference and instead try to find common ground.

Q5.(b). Provide one word substitute for the following sentence. (Any two). (04)

Ans: 1. Plagiarist

2. Amatuer

3. Harbour

Q5.(c). State the difference between warning and caution. (03)

Ans: In technical writing, especially while writing instructions, the subject matter often calls for warnings, precautions, cautions and danger alert.

A warning alert the reader to the risk or possibility of facing a personal injury or a hazard which might result in death. Example: "Unplug the computer before removing the outer case if you don't have electric shop main result."

Caution alerts the reader to the risk or possibility of damaging a product, including Data loss. Example: "do not scrap the freezer with a sharp object or nice to remove exercise. The surface may get permanently damaged".

Q6.(a). Describe any one of the following objects giving definition diagram component and working of calculator or voltmeter. (05)

Ans: 1. Calculator

Definition: A calculator is a small portable, electronic device used to perform both basic and complex operations of arithmetic.

Components: In general, a basic electronic calculator consists of the following component:

- Power source (battery or solar cell).
- Keypad (keys used to input number).
- Function commands are basic operation keys (addition multiplication) etc.
- Processor chip
- Encoder unit (converts number and functions into binary code).

- f. X register and Y register (temporary stores while calculating).
- g. Decoder unit (convert binary code into "decimal" number which can be displayed on the display unit).
- h. Display panel (Display input number, commands and results calculates usually have liquid crystal display).

Working: calculator work by processing information in binary form. When we input a number into a calculator, an integrated circuit converts those number to binary string of zeros and ones. The ICS then use the strings to turn transistor on and off with electricity to perform the Desire calculations. 100 calculation has been completed, the answer in binary form is been converted back to the normal base 10 system and display on the calculator display screen.

2. Voltmeter

Definition: Voltmeter is an instrument used for measuring electrical potential difference between two point in an electric circuit.

Components: when taking a voltage reading the instrument is placed across the portion of the circuit that is to be measured. Digital voltmeter have input in amplifier and generally have a constant input resistance of 10 Mega ohm regardless of set measurement range. To make sure that Dvm reading is used in the manufacture specified tolerance, they should be periodically calibrated against a voltage standard such as Weston cell.

Working: unknown voltage signal is fed to the plug generator, which generates a pulse whose weight is proportional to the input signal. Output of a pulse generator is fed to one leg of the

AND gate. The input signal to the other leg of the AND gate is a train of pulse. Output of AND gate is positive Trigger train of duration same as the width of the pulse generated by the pulse generator. This positive Trigger train is said to the inverter which converts it into a negative triggered train. Output of the inverter is fed to a counter which counts the number of triggers in the duration which is proportional to the input signals, that is voltage under measurement. Thus counter can be calibrates to indicate voltage in volts directly.

Q6.(b). Read the following passage carefully and answer the questions given below. (05)

The new year is the time for resolution. Mentally; at least most of us gold compile for midable list of do's and don'ts. The same old favorites recur year in and year out with the children, do a thousand and one job about the house, be nice to people we don't like, drive carefully, and take the dog for a walk everyday. Past experience has taught us that certain accomplishment are beyond attainment. If we remain deep rooted liars, it is only because we have CEO of 10 experienced that frustration that results from failure.

Most offers sale in our efforts at self improvement because our schemes are too ambitious and we never have time to carry them out. We also make the fundamental error of announcing our resolution to everybody so that we look even more foolish when we sleep back into our bad old way. Aware of this pitfalls, this year I attempted to keep my resolution to myself. I Limited myself 2 modest ambitions, to do physical exercise every morning and to read more in the evening. An overnight party on New Year eve provide me with a good excuse for not carrying out other of this new resolution on the first day of the year, but on the second, I applied myself assiduously to the task.

The daily exercise lasted only 11 minutes and I propose to do them early in the morning before anyone had got up. The self discipline required to drag myself out of bed 11 minutes earlier than usual watch considerable. Nevertheless, I manage to Creep down into the living room for two days before anyone found me out. After jumping about in the carpet and twisted the human frame into an comfortable position. I sat down at the breakfast table in an exhausted condition. It was this that betrayed me. The next morning the whole family

proved in to watch the performance. That was really unsettling but I send of the terms and jeeps of the family good humoedly and soon everybody got used to the idea. However my enthusiasm waned, the time I spent at exercise gradually diminished. Little by little the 11 minutes fell to zero. Buy January 10th I was back to where I had started from. I argued that if I spend less time exhausting myself at exercises in the morning. I hold keep my mind fresh for reading when I got home from work. Resisting the Hypnotizing effect of television, I sat in my room for a few evening with my eyes glued to a book. One night, however, felling cold and lonely, I went downstairs and set in front of the television pretending to read. That provide to be my undoing, Fortune got back to the old habit habit of dozing off in front of the screen. I still haven't given up my resolution to do more reading. In fact I have just bought a book entitled 'How to read a Thousand Words per minute'. Perhaps it will solve problem, but I just have not had time to read it.

1. Why most of us fail in our efforts for self improvement?
2. Why is it a basic mistake to announce our resolution to everybody?
